**EVERSAFE<sup>®</sup>**

**RAILING SYSTEM**

# Discover the EverSafe® Railing System

The EverSafe® Railing System is engineered to streamline the railing process, reducing design complexity and production costs without sacrificing safety.

## Standard & Flexible

The modular design of the EverSafe® Railing System employs standardized parts as a building block concept, enabling quick and straightforward design and assembly.

## Innovative Assembly

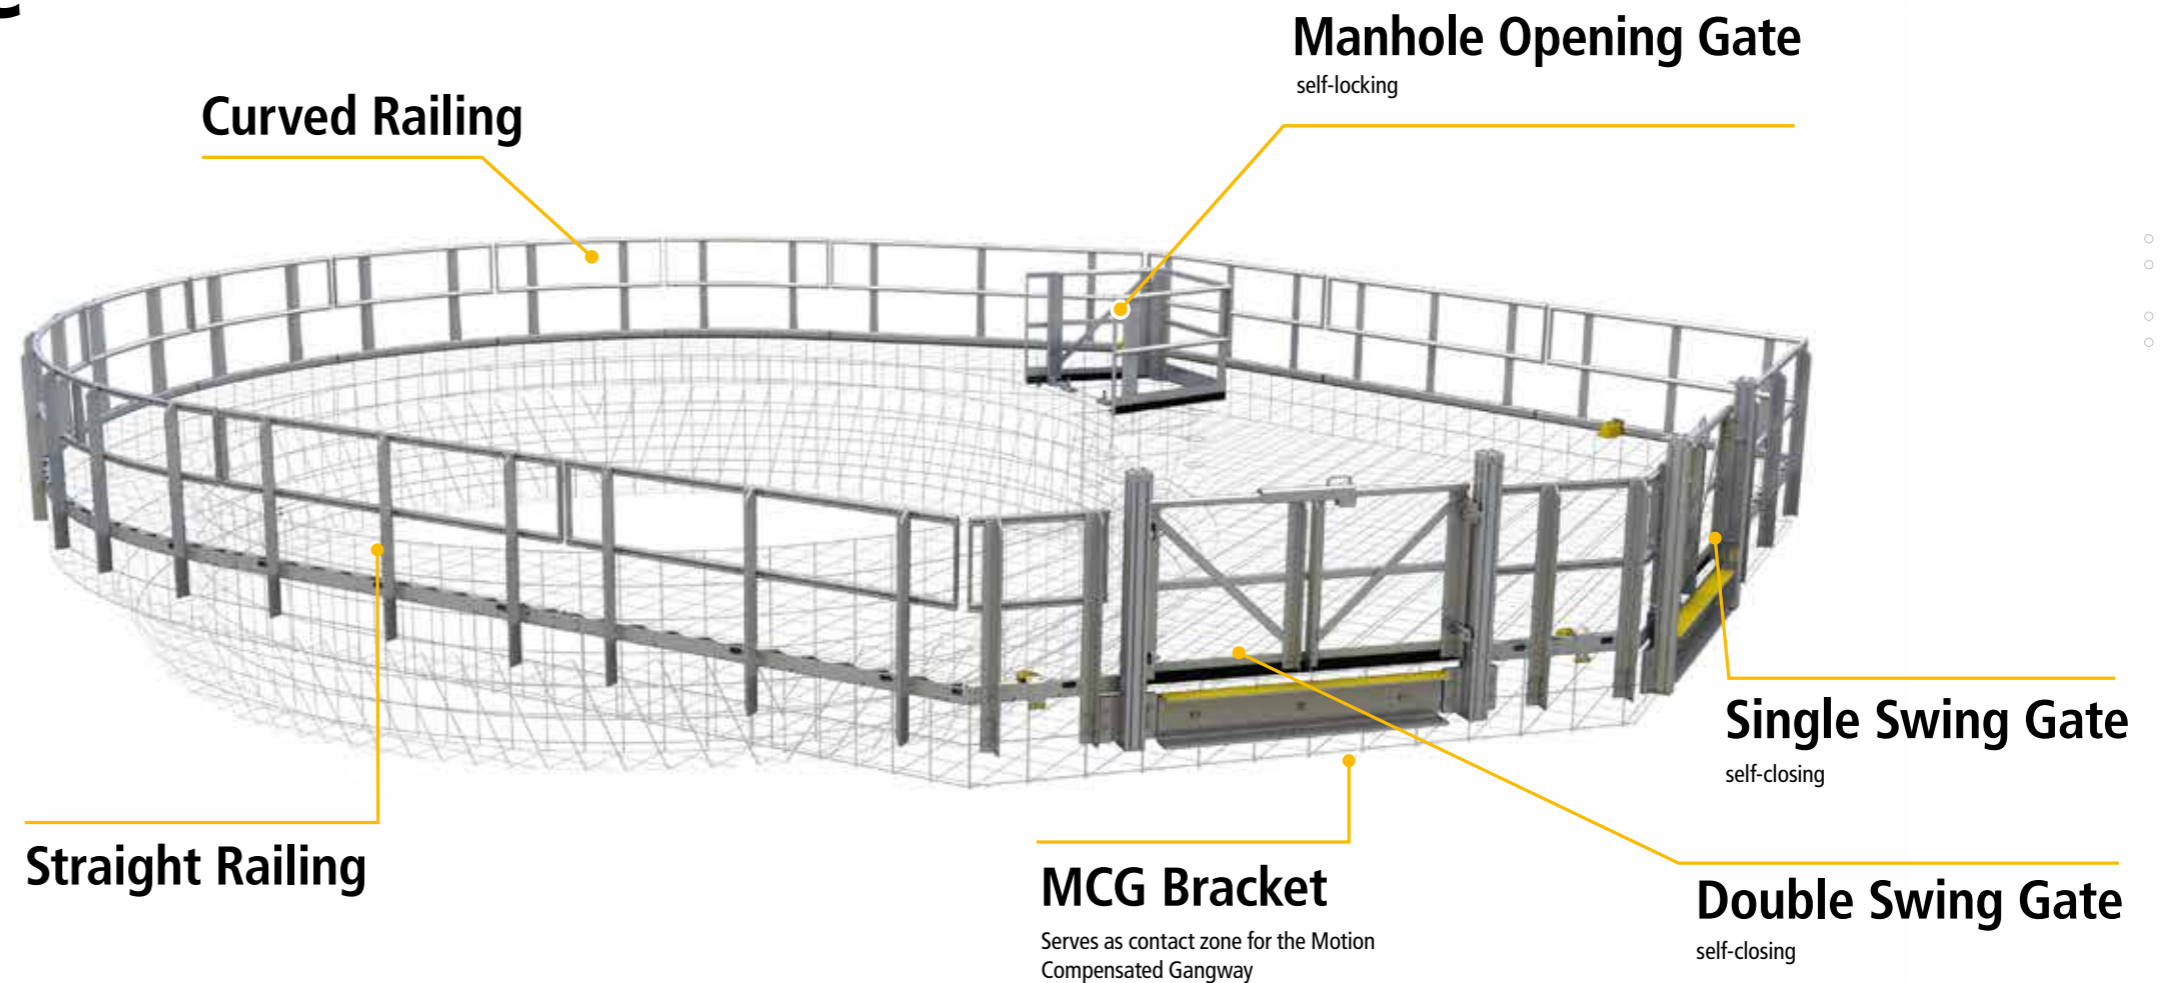

The use of rivets instead of traditional welding saves time, reduces expense and minimizes documentation effort.

## Offshore Material

Using marine-grade aluminum, the EverSafe® Railing System combines durability yet a lightweight construction providing exceptional corrosion protection.

## Enhanced Integration

The EverSafe® Railings System is designed to facilitate easy integration of components onto the railing such as aids to navigation and platform lighting.

## Norms & Standards

The railing design follows rigorous statutory requirements:

### General Standards:

(Point Loads & Line Loads)  
DNV-ST-0126 – Support Structures for Wind Turbines, December 2021

### EU Specific Standards:

EN 50308 Wind Turbines – Protective Measures – Requirements for Design, Operation and Maintenance, May 2005

### US Specific Standards:

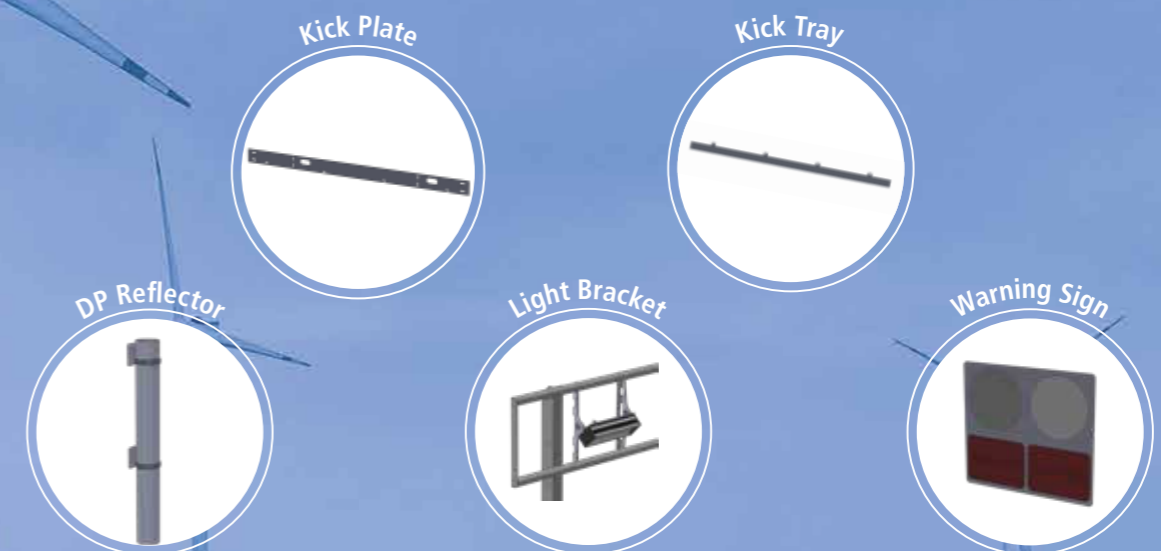

OSHA – 1910.29  
(release date 20. May 2021)  
Fall protection systems & falling object protection - criteria and practices

### APAC Specific Standards:

EN ISO 14122-3  
Safety of Machinery – Permanent Means of Access to Machinery – Part 3: Stairs, Stepladders and Guardrails, 2016

## Accessories

# INTEGRATED, SIMPLE, SAFE!

## Your Experts in Keeping Offshore Windfarms Safe!

With the EverSafe® Railing System, seamless integration of Sabik Offshore's work lights and navigation aids becomes part of the design - not an afterthought.

This unified approach eliminates interface challenges and transforms design and installation into a smooth, efficient experience.
